```javascript
let myFunction = (a,b) =>  a + b;
let result=myFunction(4,15);
console.log(result);

function myDisp(some)
{
console.log(some);
}
function hello()
{
myDisp("hello");
}
let hello2=()=>console.log("hello2");
hello();
hello2();
let var1=(function(){
let x=parseFloat(prompt("Enter a x value "));
let y=parseFloat(prompt("Enter a y value"));
return x * y;
})();
console.log(var1);
```
